

THE PROBLEM

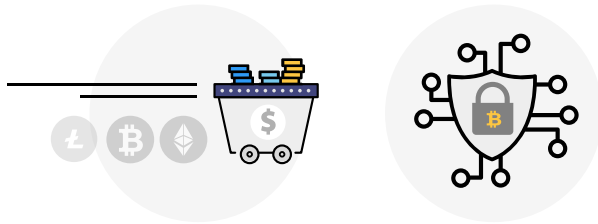

2 Historically Divided Systems: Cryptocurrencies and Fiat

Access to Traditional World of Fiat

- Lack of interoperability between systems
- Cumbersome and expensive to make international payments

Access to Credit

- Cryptocurrencies are an unrecognised asset class
- Cryptocurrencies holders are unable to leverage on their crypto wealth as collateral to unlock short and long term liquidity

OUR SOLUTION

The BridgeX Network is the framework for a financial ecosystem of decentralised credit, conversion and payment solutions, enabling fully-decentralised crypto-to-crypto collateralised lending and borrowing, crypto-to-fiat currency conversions and cross border payments. The BridgeX Network will comprise of three main components:

Core

At the heart of the BridgeX Network lies BridgeX Core. It comprises a suite of cutting-edge smart contracts hosted on the Ethereum blockchain – an on-chain loan matching service, an on-chain loan tracking service and an oracle that collects off-chain data for the loan contracts – and an integrated cash management module, BRIDGEPay, which provides off-chain solutions for crypto-to-fiat conversions and cross-border payments.

Platform

The BridgeX Platform will demonstrate the power of the BridgeX Network at its integrated best, delivering three compelling and synergistic cash management solutions within a single platform, while providing third party integrators and DApp developers with an understanding of the multitude of possibilities going forward.

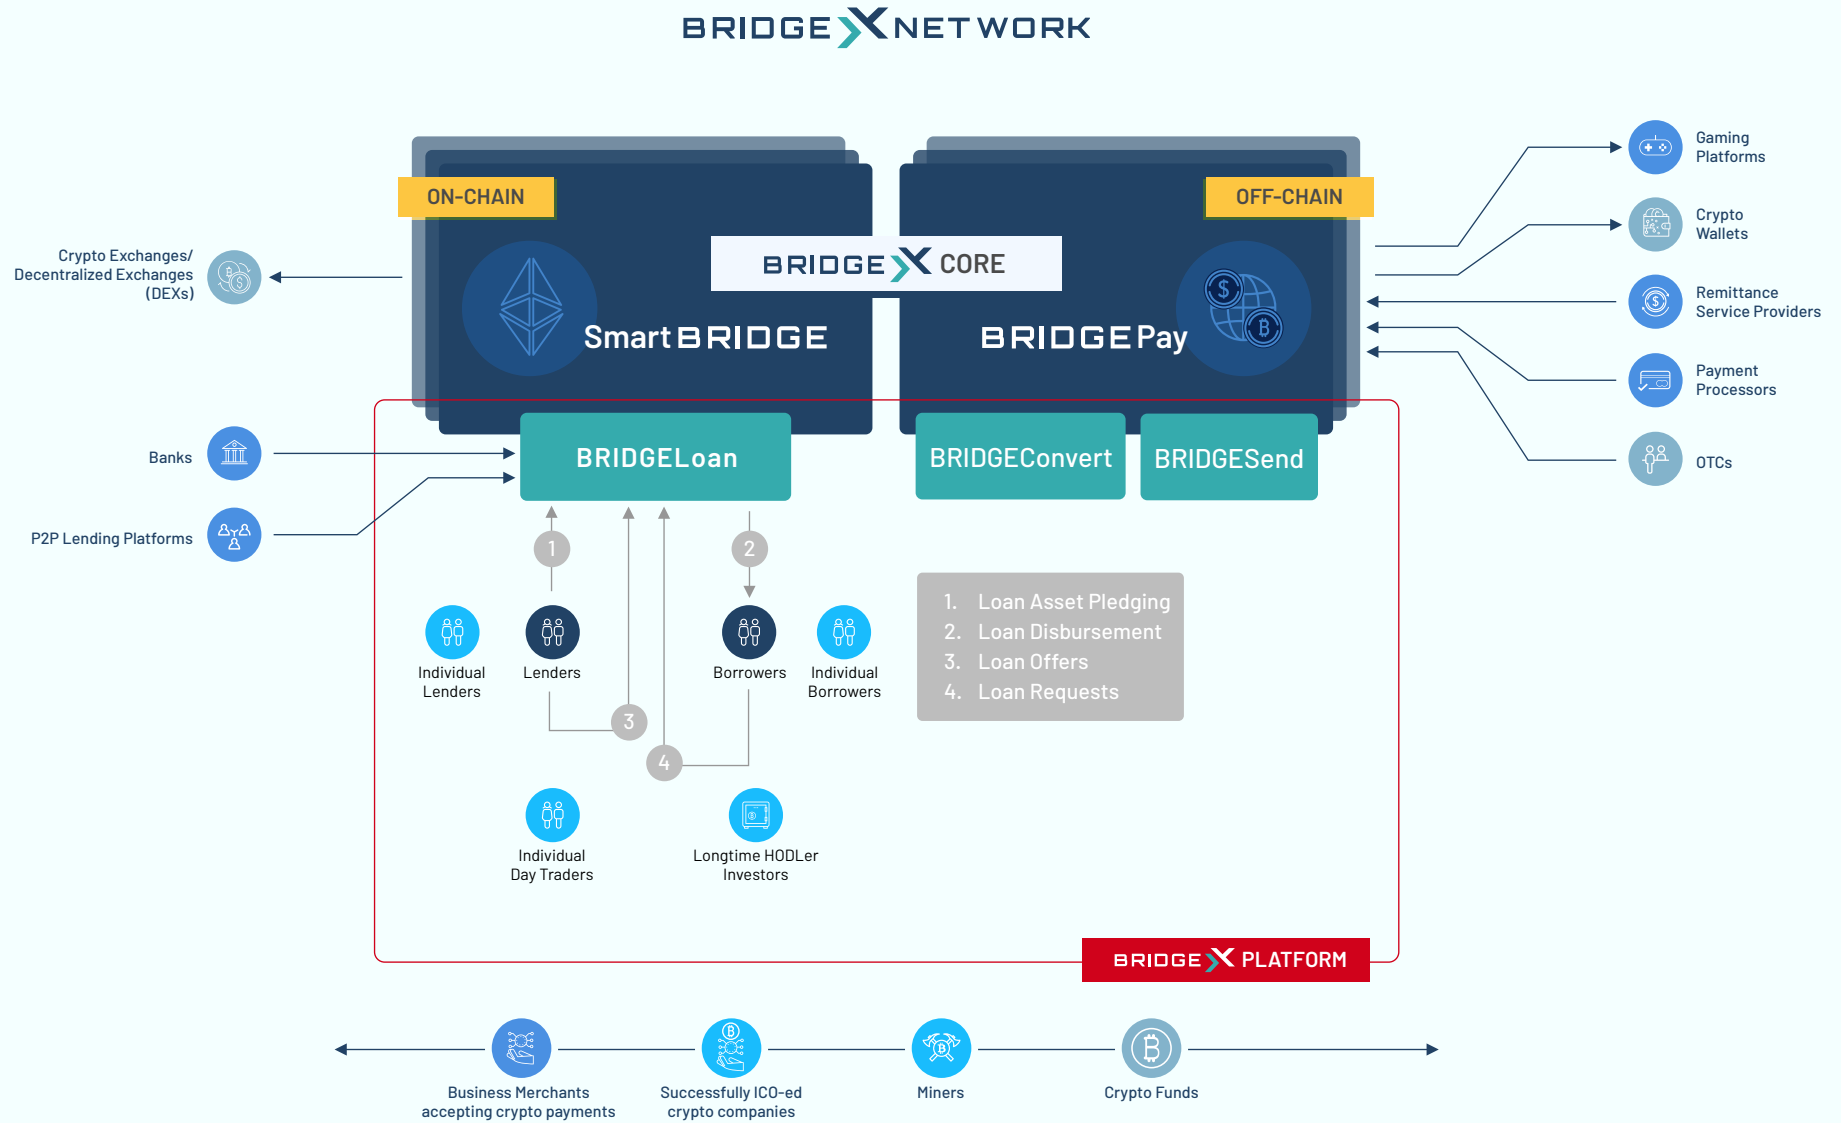

3P Integrators

Any third party integrator or distributed app (DApp) developer can seamlessly integrate with BridgeX Core via an application program interface (API) to offer new services on their existing platform to their clients or create any number of multi-faceted financial services within the BridgeX Network.

REVOLUTIONIZING FINANCE - OUR COMPETITIVE ADVANTAGES

1. **Crypto-to-Fiat Gateway:** Independent use of cash management capabilities as a comprehensive end-to-end management solution for clients' blockchain asset portfolios.
2. **2-sided crypto-to-crypto loans marketplace:** Ordinary lenders are able to participate to earn interest.
3. **Integrated cash management capabilities:** Crypto loans borrowed can be converted to fiat in more than 30 major fiat currencies and sent to multiple beneficiaries in over 180 countries.
4. **'Plug-n-play' Enterprise Solutions:** Third Party DApps and financial services can leverage on our technologies to offer new services on their existing platforms or create DApps on the network that solve real-world financial needs.
5. **3 Licenses:** BridgeX Network is the sister company of Wallex – an established international cross-border payments platform with 3 payment/remittance licenses in Singapore, Hong Kong and Indonesia.

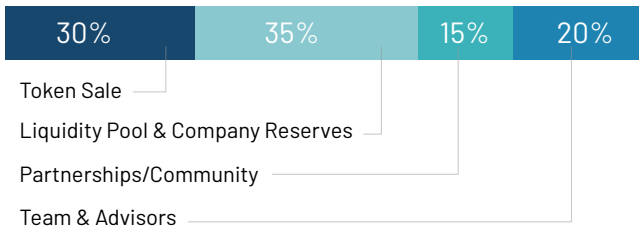

OUR ECOSYSTEM

BRIDGEX NETWORK TOKENS (BXN)

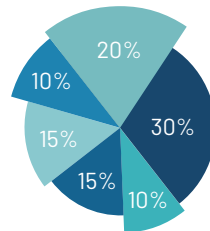

Total No of Tokens:	1 BILLION
Tokens Sale:	300,000,000 Tokens
Hard Cap:	18,000 ETH
Token Price:	0.00006 ETH

TOKENS ALLOCATION

USE OF FUNDS

Network & Platform Development - 20%
 Marketing - 10%
 Business Development - 15%
 Legal/Compliance/Tax/Admin - 15%
 Operations - 10%
 Liquidity Pool - 30%

TEAM

**Jody Ong, CEO**

CEO & Co-Founder, Wallex Technologies
 Managing Director, Ascensus Capital

Hiroyuki Kiga, COO

COO & Co-Founder, Wallex Technologies
 Ex-VP of Investments, Yello Mobile
